#### **DETAILED ACTION**

1. This action is in response in the amendment filed on 04/05/2011.

2. Claims 14 and 15 have been amended. Claims 1-19 are pending for consideration.

## Response to Arguments

3. Applicant's arguments with respect to claims 13-17 have been considered but are moot in view of the new ground(s) of rejection.

### Allowable Subject Matter

- 4. Claims 1-12 and 18-19 are allowed.
- 5. Claims 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of claims 14-17.

# Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Boneh et al. (US20030081785) (hereinafter Boneh) in view of Panjwani et al.

Art Unit: 2431

(US20020018569) (hereinafter Panjwani), and further in view of Bourne et al. (US20040003270) (hereinafter Bourne).

8. Regarding claim 13, a method comprising: obtaining, with computing equipment, an identity- based-encryption (IBE) private key of a user (Boneh: paragraph 0043); Boneh does not disclose using the private key to compute, with computing equipment, a commitment to a secret value and a corresponding decommitment. However, Panjwani discloses using the private key to compute, with computing equipment, a commitment to a secret value and a corresponding decommitment (Panjwani: paragraph 0051: combining the short-lived based station public key with its own private key to generate two shared values). Therefore, it would have been obvious to a person skilled in the art at the time the invention was made to have included in Boneh the feature of Panjwani as discussed above because using those computed values will help to protect a message sending between unsecured networks.

Boneh in view of Panjwani does not disclose using a symmetric key that is based on the IBE private key to encrypt, with computing equipment, at least one of the commitment and the decommitment. However, Bourne discloses using a symmetric key that is based on the IBE private key to encrypt, with computing equipment, at least one of the commitment and the decommitment (Bourne: paragraphs 0074 and 0105). Therefore, it would have been obvious to a person skilled in the art at the time the invention was made to have included in Boneh in view of Panjwani the feature of Bourne as discussed above to allow and facilitate such controlled rendering, especially in an office or organization environment or the like where messages are to be shared

amongst a defined group of individuals or classes of individuals (Bourne: paragraph 0012).

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TRANG DOAN whose telephone number is (571)272-0740. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan J. Flynn can be reached on (571) 272-1915. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
